Jimmy Bachir- One Page Action Plan

Objective: Obtain a data-driven recommendation to effectively target an optimal country for the new COVID-19 vaccine roll-out.

Key Dates

Date	Description
March 10	Collection of data and research
March 15	Analysis of collected data
March 19	Creating dashboard/stories for presentation
March 22	Preparing presentation
March 25	Rehearse presentation

Required External data

- Populations dataset
- Datasets regarding Vaccine rollouts in other countries.
- Additional data to support original CSV (to fill in missing values)

Data Cleaning items

- Dates to be aligned.
- Single column rate to be taken. Vaccinations raw when available and vaccination when not.
- Add country populations.
- Fill in missing values.

Client Questions

- Which vaccines can the company provide?
- Where is the company located?
- Does distance to the countries play a role?
- Is there other factors to consider besides the total number of doses to provide?
- Any limitations on datasets to use? Sources?
- Any vaccines single dose?
- Are we assuming a vaccination rate of 100% per country?
- Immunocompromised etc. to be considered?
